Interests

About Me

I'm an enthusiastic web developer at the beginning of my career, with a growing portfolio of personal projects and freelance work. I started coding about two years ago and have fallen in love with turning design concepts into functioning websites. While I'm still developing my technical expertise, I bring a fresh perspective and eagerness to learn to every project.

I'm currently focused on mastering responsive design principles and building a solid foundation in JavaScript before moving to more advanced frameworks. I believe in creating simple, intuitive websites that are accessible to everyone.

Education

2023 - Present

BSc in Computer Science

University

Currently in my second year of university studies. Developing strong foundations in programming languages including Python, Java, C, and C++. Focusing on building both theoretical knowledge and practical development skills.

Jan - May 2023

Software Development Certification

MODCOM Institute of Technology

Completed an intensive software development course covering multiple programming languages and frameworks. Created practical projects including Flask applications and CRUD systems.

UI Design

Featured Projects

Canvas Drawing Board

HTML Canvas

JavaScript

Firebase

An interactive drawing application that allows users to create digital artwork with various brush sizes and colors. Users can save their creations to a Firebase gallery.

Sparkles Kids

HTML

CSS

Responsive

A responsive website for a children's clothing boutique. Features product displays, category navigation, and contact information.

Secure Login System

HTML

PHP

Security

A secure authentication system implementing session-based login with password hashing, secure cookies, and SQL injection prevention.

Personal Portfolio

HTML

CSS

JavaScript

My personal portfolio website featuring animated backgrounds, responsive design, and interactive elements.

Experience

Jun 2024 - Present

Freelance Web Developer

Self-employed

Design and develop websites for small businesses and individuals. Create responsive layouts, implement interactive features, and ensure cross-browser compatibility.
